

Review of: "Periodic second-order systems and coupled forced Van der Pol oscillators"

Shankar Rao Munjam

Potential competing interests: No potential competing interests to declare.

After reading and analyzing the present manuscript, I feel that there is little new work in the present study.

Comments are:

Comment-(1) Clarify and discuss the novelty and compare it with those available in the literature, also including discussions on potential applications.

Comment-(2) Give a broader view of the literature on the topic and the current state-of-the-art. Up-to-date references should be included in your work; paper link: <https://link.springer.com/article/10.1007/s11071-018-4725-9>

It is acceptable after minor changes in this work.

Regards,

Rao
