Streptococcus pluranimalium

National Cancer Institute

Source

National Cancer Institute. *Streptococcus pluranimalium*. NCI Thesaurus. Code C124412.

A species of Gram-positive coccus-shaped, non-motile bacteria in the order Lactobacillales. *S. pluranimalium* is positive for acid production from glucose, fructose, and trehalose. This species is primarily responsible for infection in bovine and avian species with only limited identification of infection in human clinical isolates.
