Potential competing interests: No potential competing interests to declare.

The authors have effectively articulated the primary objective of their research and the strategic approach adopted from the outset. Their work provides comprehensive explanations, thorough methodologies, and in-depth analyses, all of which are presented with sufficient detail to enhance comprehension and ensure the reproducibility of the study. The overall structure of the work is meticulously organized, with a clear and logical flow that enhances readability. Moreover, the graphical representations and tables included in the study are adequately commented upon, aiding readers in interpreting the presented data and findings.
