I believe after some modifications the manuscript has a great potential for the scientific community. Following comments are required to be implemented for improving the manuscript.

- The introduction needs to be revised. Please specify novelty of the study.
- The literature review section is missing.
- The conceptual framework you developed in the study (figure 1) is not analyzed so what is the use of it.
- Limitations and future direction of the study is missing.
- Some grammatical errors are there (like spelling of gender in figure 5), please revise it accordingly.
