

Review of: "Hepatoprotective Effect of the Ursolic Acid-Oleanolic Acid Mixture Administered Intragastrically in Mice with Liver Damage Induced by Anti-TB Drugs"

Saima Najm

Potential competing interests: No potential competing interests to declare.

The article is constructive and consider for acceptance with slight modifications.

1. In introduction section add reference with each line instead of each paragraph. Also use different reference for each line.
2. In in-vivo studies do mention no of animals used in this study. Also explain grouping of animals.
3. Figure 2. Do mention and explain with the help of arrows where damage occurs.
