

Review of: "Measuring researchers' success more fairly: going beyond the H-index"

Kamal Hattab

Potential competing interests: No potential competing interests to declare.

This is a valuable research attempt. I agree with the researcher that the impact factor and citation metrics are not sufficient and require development. The researcher's suggestions in this field are good, but they should be supplemented by considering the extent of service to society, institutions, and the field of study or specialization to which the researcher belongs, as well as the degree of benefit to humanity."
