

# Review of: "Digital Identity and Promotion of Research Works – Analytical Study of Social Science Researchers at Taiwanese Institutions"

Chengzan Li

Potential competing interests: No potential competing interests to declare.

This article summarizes the building mechanisms, role and characteristics of digital identity, which can help readers understand digital identity.

Scientific researchers can display their research outputs through digital identity centrally, which can facilitate readers to retrieve and obtain these achievements, and accelerate the dissemination of achievements to a certain extent.

However, on the whole, the depth and breadth of the analysis part of this article are not enough. For example, what is the role of digital identity in promoting and valuing scientific content. This needs more quantitative data.

Besides, there are many factors that determine the influence of academic achievements. Whether the author can use the knowledge of social networks and information dissemination mechanism to conduct some in-depth analysis.

In essence, the decisive factor for the effective dissemination and even high citation of academic achievements lies in the value of academic achievements. On the other hand, whether academic achievements can be indexed and disseminated by popular academic platforms is also crucial.
