

# Review of: "Continuum Models and Singularities for Heat Distributions From Light"

Masoud Rabeti

**Potential competing interests:** No potential competing interests to declare.

This paper is about Continuum Models and Singularities for Heat Distributions From Light.

The abstract is too brief. Please add methodology, software, and the significant results obtained through the research.

The Introduction is weak. Rephrase the last paragraph of the introduction with the novelty of your work.

The figures used in this article are of low quality.
