Potential competing interests: No potential competing interests to declare.

The problem and purpose of the research were adequately explained, and literature support was provided.

The method of the research and the scales used in the research are adequately explained.

In the research, the findings are shown and explained appropriately with tables.

The discussion part of the research is rich enough.

The conclusion part of the research is insufficient. A direct suggestion is presented without giving the results of the research in this section. First of all, the results of the research should have been given.

In general, it is a study that meets scientific criteria.
