

Review of: "Mental health in fishing communities: An overview of current knowledge and information gaps for fisheries"

Nazila Shahmansouri

Potential competing interests: No potential competing interests to declare.

This topic is important.

This article is well-written and contains valuable points.

The following are suggested:

In the initial part of the discussion, the paragraphs are given without any special analysis.

Investigations between different cultural and geographical communities and various factors in these communities are recommended.

It would be better to have more analytical information in the discussion.

The main purpose of the article is not fulfilled in the discussion section.
