Review of: "Evaluation of Ozonized Fibrin-Rich Plasma as a Therapy for Facial Rejuvenation: A Clinical Case Study"

Mahin Aflatoonian¹

1. Kerman University of Medical Sciences, Iran, Islamic Republic of

It is an interesting case study that evaluates the efficacy of ozonized fibrin-rich plasma on facial rejuvenation. The manuscript was written very well. It needs only minor revisions. The age of patient number 3 has been deleted from the manuscript. If possible, the references for the evaluation methods are better to be mentioned. It would have been better if the study was done on patients who were all older than 40 years old.
