

# Review of: "Digital Skills and Learning in Tanzania Secondary Schools: Students and Teachers' Influence"

Caroline Ochuko Alordiah

Potential competing interests: No potential competing interests to declare.

The introduction is good but inclusion of the significance and scope of the study will make it more robust. The literature review and method sections are well written. However, the Likert scale used for the questionnaire should be included. Please show whether you used software to analysis the qualitative data. The presentation of the results is ok. Please include the implications of your findings and the limitations of your study to the discussion section.
