Potential competing interests: No potential competing interests to declare.

Abstract :

1. Write down the abrasion problem first
2. Write down the section to be reported in this article
3. Write qualitative data that supports quantitative results
4. Write down the novelty and benefits of the study

Introduction :

1. Use the literature of the last 10 years
2. Using only one SDGs goal that is most related to the media created

Research method :

1. Interview is a qualitative data collection technique and questionnaire is a quantitative data collection technique, both of which cannot be made into one
2. Qualitative and quantitative data are processed respectively, interview data produces a hypothesis model and quantitative data as a validation stage of the hypothesis
3. The analysis stage with interviews can be the stage of hypothesis formation, the hypothesis is then analyzed for quantitative validation using expert validation data
4. Using only one SDGs goal

Research Result :

1. This media is very good and interesting but article writing is not supportive
2. Results are prepared according to the stages of research and development, analysis-design and others, at each stage there must be results
3. Learning objectives from the material aspect must be analyzed and adjusted to the media

References : must be current or 10 years old.
