

Review of: "[Research Note] Long COVID in Mexico – Research Efforts"

Brent Brown

Potential competing interests: No potential competing interests to declare.

The article could contextualise this further:

1. CFS/ME renamed in 2015 as systemic exertion intolerance disease (SEID)
2. In 2017 other summary reviews indicate that the causes of ME/CFS were unknown very similar to Long COVID
3. You mention CD57 in CD8+ cells, but should this not be expanded to mention and outline the cell types and role specifically as we know that CD8 cells are cytotoxic?
4. [Vaccines | Free Full-Text | Innate and Adaptive Immunity during SARS-CoV-2 Infection: Biomolecular Cellular Markers and Mechanisms \(mdpi.com\)](#)
