

Review of: "Exploring the Impact of Future Land Uses on Flood Risks and Ecosystem Services, With Limited Data: Coupling a Cellular Automata Markov (CAM) Model, With Hydraulic and Spatial Valuation Models"

Mohammad Hasani

Potential competing interests: No potential competing interests to declare.

I have completed the review of the manuscript. My assessment identified several significant reasons that, in my opinion, the manuscript does not meet the standards required for publication in the esteemed journal.

Fortunately, this submission does have enough scientific excellence because of the originality, novelty, and depth of the research work. Therefore, I am pleased to inform you that I can recommend it for publication in its current form.
