Comments - further recommendations

I hope these comments are helpful.

General Comments

This study aimed to delve into the intricate facets of aquaponic systems, elucidating their constituent elements, their roles, and the interconnecting mechanisms pivotal for seamless operation. **The article may be acceptable for publication after the authors make some revisions.**

Specific Comments

• Scientific Comments

1. **Abstract:** - The authors should re-arrange and re-write the abstract in the following order (Problem of research, aim of study, remarkable methodology, remarkable results, and significance of study).
2. **Introduction:** - The authors should clarify their study's aims and significance compared to similar studies.
3. **Materials & Methods and also Discussions:** - The authors should provide relevant references to some subsections.
4. **Conclusions:** - The authors should rewrite this section comprehensively and suitably. – Also, the authors should add recommendations and prospects.

• Editorial Comments

- The authors should polish the linguistic English style all over the manuscript.
- The authors should apply the guidelines for authors in general on the whole manuscript (e.g., correct several editing

errors, etc.).

Conclusions:

- (a) Accepted without modifications

—
- (b) Accepted with minor changes

—
- (c) Accepted with moderate changes

✓
- (d) Acceptable if major changes are made

—
- (e) Rejected
