

# Review of: "The tumour microenvironment in BRCA1/BRCA2 hereditary breast cancer and the role of epigenetics in its regulation"

Prema Saldanha

Potential competing interests: No potential competing interests to declare.

- The article is well-written and the concepts and pathogenetic mechanisms are well brought out.
- The introduction could be a little more elaborate to explain the contents of the article.
- A conclusion is required, summarizing the salient points.
- A few diagrams illustrating the various mechanisms will enhance the impact of the article.
