Paper titled "Expansion of the Antifungal Activities through In Silico Docking Study of Compounds from Albizia lebbeck Fruits," is important, however please consider these comments to further improve the article:

1. Rephrase the conclusion; the aim of the study should be included in the introduction part.
2. Please consider adding this reference [Synthesis, anti-amoebic activity and molecular docking simulation of eugenol derivatives against Acanthamoeba sp.](#) Saudi Pharmaceutical Journal, 2023.
3. Please state the ideal solvent system to extract the targeted compounds.
