

Review of: "Assessing students' attitudes and perceptions towards statistical literacy in a university system in a developing African country"

Yahya Maroofi¹

¹ University of Kurdistan

Potential competing interests: No potential competing interests to declare.

1. It is good research and can help solve the problem of fear of statistics, which is a global challenge among university students.
2. In the introduction section, it is necessary to mention the theoretical foundations of the subject.
3. The evidence shows that a mixed research method was used because both quantitative and qualitative data were collected. It is recommended to mention this in the methodology.
4. In the methodology section, the statistical population, sampling method, and how to select the sample size have been neglected.
5. End references should be set according to APA style.
