

Review of: "Exploring the Impact of Future Land Uses on Flood Risks and Ecosystem Services, With Limited Data: Coupling a Cellular Automata Markov (CAM) Model, With Hydraulic and Spatial Valuation Models"

Hechmi Belaid

Potential competing interests: No potential competing interests to declare.

1. The colors in the land use maps are not well chosen; for instance, forests should be green.
2. In Figure 4, which is the heart of your work, the land use areas remain unchanged over time. I didn't understand this unless you have an error.
