Potential competing interests: No potential competing interests to declare.

In the abstract, you have mentioned that warning black box drugs must be registered as notes in prescriptions, either written or electronic, and again about electronic prescriptions written, so frame the sentence again. Also, in the abstract, FDA (Food and Drug Administration) full form should be written; then, in brackets, you can write the short form. That short form can be used subsequently.

In the paragraph on cigarettes, frame the sentence again as it is not highlighting the meaning of the whole paragraph. A fruitful outcome is not evident through those sentences.

In the conclusion, also in the line "We suggest a barcode or logoblack box word is repeatedly used, and the proper meaning is not clear after reading those lines. So, also frame that sentence again.
