

# Review of: "Human Galectin-9 Potently Enhances SARS-CoV-2 Replication and Inflammation In Airway Epithelial Cells"

Toshio Hattori<sup>1</sup>

<sup>1</sup> Tohoku University

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

The authors used a stable recombinant protein for the experiment as described in the text. But the detailed description of stable form was not given. Because stable form is not easily cleaved by protease, it is hard to say that the experiment using it reflects the actual pathological conditions occurring in the living body..
