The manuscript, entitled "**The Effects of Greenery in Balconies of Apartments on People's Well-Being: Using Virtual Reality**," was submitted to the **Qeios** journal.

The authors have done a remarkable job, and overall, the manuscript is well-written and presents new scientific knowledge to the scientific world. Before acceptance of this manuscript to the journal, I recommend minor suggestions:

- Contribution is new and original.
- The title clearly reflects the contents.
- In the abstract section, significant results need to be added.
- Please check the authors' affiliation numbers.
- Authors have suggested that typo errors and word spacing issues be removed.
- From a novelty point of view, how is this work unique from already published literature?
- Authors have not clearly indicated the figures' numbering in the text body of the manuscript.
- Results are clearly represented.
- The organization of the review is satisfactory.
- The content justifies the length of the paper.
- References need to be formatted according to the journal style.
- Authors should read and cite some recently published literature in your paper.
- In the conclusion section, more information needs to be added.
- I recommend acceptance after these changes to the journal.
