Potential competing interests: No potential competing interests to declare.

The article is very well written and author demonstrates a sound understanding of this field. The study conducted a thorough investigation. However authors are recommended to

1. Justify more about the research gap and contribution of the study
2. compare its results with already existing studies
3. The study can increase the sample size by including professional practitioners.
4. The study used simple methodology, however certain other methods can be used.
