Recommendations:

1. The introduction section, particularly the first section, may be improved.
2. The language has to be improved.
3. To properly describe the information, authors could enhance the captions of figures and improve the quality of figures.
4. Also, double-check that the formatting of the work adheres to the guidelines outlined in the Journal.
5. Add state-of-the-art literature study and the proposed model's performance comparison.
6. Emphasize the work's key contributions.
