Potential competing interests: No potential competing interests to declare.

First of all, this article is a quantitative in nature. The use of literature review and previous research as a base to:

1. Explain the background
2. Develop a hypotheses is a must. I did not see a synthesis of literature review before the hypotheses
3. Discuss the result and findings

Therefore, to make this article valid with good methodology, the author(s) have to use rigorous literature review that are current and relevant.
