Potential competing interests: No potential competing interests to declare.

The writers have put in a lot of work into this excellent systematic evaluation. Bravo to them.

Methodology

But something about this statement bothers me: "After accounting for **2023 papers**,".

This reviewer believes that the author meant to say that "only articles published in 2023 were included in the search." If so, I now suggest rewording that remark as follows:

"Only articles published in 2023 were included in the search analysis."

I strongly recommend this submission for publication.
