K-RAS GLY-12 Mutant Protein

National Cancer Institute

Source

National Cancer Institute. *K-RAS GLY-12 Mutant Protein*. NCI Thesaurus. Code C29137.

A synthetic form of the K-ras protein containing any one of a number of point mutations at position 12 which is normally occupied by glycine (GLY). Vaccines using mutant K-ras proteins may be used in the immunotherapy of various cancers that express mutated K-ras proteins. (NCI04)
