

Review of: "The Consequences of Political and Economic Choices: Exploring Disaster Vulnerability with the Structure, Resource, and Behaviour Change model (SRAB)"

Uma Langkulsen

Potential competing interests: No potential competing interests to declare.

The paper is generally good and well structured. However, the authors may consider the following.

Keywords:

- Behaviors; consider using **farming practices**. Individual behaviors of farmers and or the community members and their influence in relation to the model is not clear.

Materials and methods:

- For easy understanding by readers define HH by putting in brackets e.g., **Table 1: Household (HH) Profile**.
- Highlighting the various subcategories may be helpful as well.

Discussions:

- Provide the limitations of the study.

References:

- Some references used are over a decade or two, more recent publications are recommended.
