This work is very interesting and well-written. Here, some important effects due to climate changes are considered for the Ben Tre coastal area. I have only a few suggestions to improve this work. The term "sea level rise" must be corrected to "sea-level rise" for each sentence in the manuscript. In Figure 1, a geographic grid must be inserted to identify the location of the study area. Finally, I suggest also considering the contributions of vertical land movement and sedimentary balance for livelihood vulnerability.

Kind regards.
