Potential competing interests: No potential competing interests to declare.

This is a constructive discussion of the nuances of the question of the eliminability of a non-naturalistic surrogate for necessity. This is an argument on which there will be no last word, so the question is whether the paper moves the discussion forward by clarifying it. The discussion of Hintikka is particularly useful in doing so, though it also points to other possible naturalizing strategies. In any case, it is a useful and valuable paper.
