Potential competing interests: No potential competing interests to declare.

1. The authors should give an overview of the whole article in the introduction part. The current form looks messy.
2. The authors should mention the concept of this work along with the progress against the most recent similar studies.
3. I suggest the authors add more details about statistical data related to the manuscript.
4. Does the future of study lie in this area? Are there other more promising areas in the field that could be progressed?
5. The conclusion should contain some quantitative information also.
6. Include more references in the Introduction and section 4.
7. The application of AI during COVID-19 was repeatedly mentioned, but no details were provided about how it was used.
