Potential competing interests: No potential competing interests to declare.

The current version of the article falls short of the required standards for publication in the journal due to several key issues:

1. The Introduction lacks depth and requires expansion. The subheading '1.1. The Prevalence and Impact of Viral Skin Infections' appears unnecessary and should be removed.
2. Section 2, including sub-sections 2.1 to 2.4, needs more detailed explanation.
3. In Subsection 3.2, it is essential to include the 'specific keywords.'
4. All subsections in the manuscript are underdeveloped and require thorough elaboration and clarification.
5. Relevant Figures should be included to enhance the manuscript.
6. Overall, the entire manuscript needs further elaboration.
7. More references need to be incorporated into the manuscript, ensuring they are appropriately cited in relevant sections.
