Review of: "Deep Learning in Medical Image Registration: Introduction and Survey"

Ziyu Shu[1]

1 University of Florida

The overall presentation of the article is commendable but leans towards a more theoretical approach.

Consider including a comparative analysis of existing models to provide a stronger basis for evaluation.

Ensure that the abstract is concise and clear, conveying the essence of the research effectively.

The conclusion should include a brief summary of the main points discussed in the article.

Cite the sources of the figures used in the paper to maintain proper attribution and credibility.

In summary, while the core of the survey is promising, there are areas that require attention and improvement to elevate the quality and impact of this research paper. Paying close attention to the suggested revisions will result in a more polished and comprehensive contribution to the field of image registration techniques.
