Potential competing interests: No potential competing interests to declare.

1. The manuscript provides important information about water sanitation in schools in Zimbabwe. The manuscript

3.1 Study Area

Explain why you chose this area as your study area. What is so unique about the area?

3. 2. I suggest you should rather say a descriptive research design was used, and then explain the methods used under the descriptive research design.

3.2.1. Questionnaires in this section clarify the age group of the students you used to collect data from. Also, explain how you sought consent from these students to conduct research with them.

3.2.2. Interviews: In this section, please clarify what type of interviews were conducted. Were the interviews semi-structured or structured? Also, explain how they were conducted: face-to-face or online.

Explain why you chose to interview the people you mentioned. What was the importance of each respondent?

Explain when the interviews were conducted.

3.6. Data Analysis - You only explained how data from questionnaires was analysed. You need to explain how data from interviews and documents was analysed and presented.

Figure 3 - The Y and X axes need to be labelled.

Figure 4 - Axis title: Label the X-axis properly.

Figure 5 - label the Y and X axes.

References - Be consistent in using one reference style.
