# Lead Placement McFee-Parungao

National Cancer Institute

## Source

National Cancer Institute. *Lead Placement McFee-Parungao*. NCI Thesaurus. Code C71119.

An electrocardiogram (ECG) lead placement for determining 3 orthogonal components X (back to front), Y (right to left) and Z (foot to head) of the heart. This system places the electrodes closer to the heart to achieve better orthogonality and a homogeneous lead field.
