Potential competing interests: No potential competing interests to declare.

1. The abstract needs to add:

- Add the urgency of the research
- Add specific information about how the research explored socio-economic impacts. Explicitly state the type of impacts researched, e.g., employment, income, or access to energy infrastructure
- Add some details about how the research measures socio-economic impacts, e.g., whether using surveys, interviews, or secondary data analysis
- Add a brief but informative summary of the main results, e.g., cost reduction or improvement in quality of life, rather than simply stating that "The results demonstrate the successful generation of electricity"
- Include the long-term impact of implementing the system
- Project leader and department are not required in the abstract.

2. More explanation about:

- Geographical and social context
- Energy issues in rural areas of the Philippines, particularly in Sitio Singawan, Barangay Umiray
- Brief overview of renewable energy and the Hybrid Pico Hydro-Solar Generation System
- Research purpose and contribution.

3. Add the research workflow to the methodology section.

4. The discussion should be added with some literature to justify the findings.

5. In the conclusion, the writers should address some key points as a consequence of the findings and discussion.
