Dear Authors, I read your manuscript with interest. Here are my comments/suggestions. The results section is too long, some paragraphs of the results section belong to the discussion section. Additionally, conclusions section is very long. 1 or 2 paragraphs reflecting the results would be enough for this section. The "..... even cloth masks confer a significant level of protection compared to not wearing a mask at all." sentence in the conclusion section is not the result of your study. There is no control group in this study. Regards.
