

Review of: "Enhancing Supply Chain Management Risk Mitigation: A House of Risk Methodology Applied to Brick Manufacturing in Aceh Besar Regency"

Hima Gupta

Potential competing interests: No potential competing interests to declare.

The Paper of Enhancing Supply Chain Management Risk Mitigation for Brick Manufacturing is good, as the authors have tried to cover Supply Chain and Risk Management together.

The framework used in this paper is a modified version of the old FEMA and SCOR Model.

Though the findings mentioned in this paper are unique, I found that there is a lack of clarity in terms of the utilization of these techniques. The authors could have elaborated in a much more crisp way so that everyone can understand it.

The paper can be accepted with minor changes.
