

# Review of: "A brief introduction to the COM-B Model of behaviour and the PRIME Theory of motivation"

Evangelos Karademas<sup>1</sup>

<sup>1</sup> University of Crete

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

This is a fine concise summary of two brilliant interrelated theoretical models. I think I only miss a statement about the existing empirical data supporting these models, as well as a phrase about their potential limitations.
