Potential competing interests: No potential competing interests to declare.

The article is an excellent work, it is well presented, narrated and discussed. It also include all the elements that a scientific study incorporates. However, it will be great if the research Grammarly check the study as a proof read. In addition, the regression part need to be checked for diagnostic tests such as stationary (if the data is time series), multicollinearity, heteroscedasticity, and autocorrelation tests. Source should be indicated below figures and tables.
