Potential competing interests: No potential competing interests to declare.

**Comment 1:** The inclusion of "House of Risk," "HoR Phase 1," "HoR Phase 2," and the "Supply Chain Operation Reference (SCOR) Model" within the literature review section seems more fitting for the methodology section. I recommend relocating these components to the methodology section to ensure clarity and alignment with the structure of your paper.

**Comment 2:** The sections on Data Collection, Data Processing, and Data Analysis lack specific details and numerical examples. To enhance clarity, provide a detailed explanation of these methods, including their mechanics, relevance to the study, and why they are effective solutions. Incorporating numerical examples would further illustrate the application of these methods in your research.

**Comment 3:** The risk you provided in Table 2 is not justified. Please explain the method or process to identify these risks. Similarly, in Table 4, there's a need for clarification on how risk treatment strategies for identified risks were defined.

**Comment 4:** The discussion section is short and does not well explain the output of the study. Expand upon the results and their implications to provide a more comprehensive analysis of your findings.

**Comment 5:** Abbreviations are defined multiple times throughout the manuscript, which is unnecessary. Define each abbreviation only once, and subsequently use the abbreviation without redefining it.
