**Potential competing interests:** No potential competing interests to declare.

It didn't indicate the methodology of the study (especially method of data analysis and the type of secondary data used). The research article's main goal is to examine the impact of management information systems (MIS) on the coffee farm sector in SWER but reserach findings related to the impact of of MIS on the coffee farm sector are not investigated through out the review as well as in the abstract part. The paper contains only a literature review. No research methods or direct research conclusions are presented. A discussion should be included in the paper that includes reference to other authors and confirms the claims made in the paper.
