## Flourishing in Salsa Dance: A Qualitative Investigation of Aesthetic, Artistic, and Creative Contributions

**Abstract:** The abstract of the research provides a comprehensive overview of the research, effectively conveying the essential aspects without the inclusion of references. While this adheres to the general practice of keeping the abstract concise and focused on summarizing the research, it might be beneficial to provide a slightly expanded set of keywords for improved searchability.

**Introduction:** The introduction chapter is well-structured and could be further enhanced by subdividing it under subtitles such as problem statement, purpose of the study, significance of the study, and conceptual model. This segmentation would provide readers with a clearer roadmap of the research, aiding in better comprehension.

**Procedure:** The practice of mentioning author profiles within the research article is generally discouraged. Authors typically focus on presenting the research content rather than personal details. This ensures a more streamlined and professional approach to the presentation of the study.

**Methodology:** The methodology section is commendably comprehensive, offering a clear and detailed explanation of the research approach. The authors have successfully outlined the research design, data collection methods, and analysis techniques, contributing to the overall credibility of the study.

**Analysis:** The authors exhibit proficiency in presenting the analysis and developing themes. The clarity in articulating the findings enhances the overall quality of the article. The thoroughness of the analysis adds credibility to the research and ensures that readers can grasp the implications of the study.

**Final Comments:** In conclusion, the article showcases innovation and overall quality. However, it is noted that the authors drew inspiration from the PERMA Model of Seligman without explicitly acknowledging it in the title. While this may be perceived as a slight drawback, the substance of the article compensates for this issue. If the article aligns with the standards of the journal, it is recommended for publication. The inclusion of a more extensive set of keywords and the subdivision of the introduction into specific subtitles could further enhance the article's accessibility and reader engagement.
