Cupriavidus pauculus

National Cancer Institute

Source

National Cancer Institute. *Cupriavidus pauculus*. NCI Thesaurus. Code C86331.

A species of aerobic, Gram negative, rod and coccus shaped bacterium assigned to the phylum Proteobacteria. This species is motile non-fermentative, oxidase and catalase positive, does not reduce nitrate and is indole negative. *C. pauculus* is found in water and has rarely been associated with human infection but may be considered pathogenic in immunocompromised individuals.
