**Potential competing interests:** No potential competing interests to declare.

The main result in this paper is to study the closed subsets of the vector space of multi-indexed sequences over a field with respect to the pointwise convergence topology. The paper is interesting and well written. The result is interesting in the field of topology. Then, I recommend the publication.

I mention some typos/suggestions:

P.4 L.2: Delete ":" after Then.

P.10 L.15: Replace "By (24)" by "From (24), we obtain"

P.11 Ref.2: Replace "1à 5" by "1 à 5".

Ref.8: Add "." after J.C and replace "Volume 2" by "(2)".
