Potential competing interests: The author(s) declared that no potential competing interests exist.

Congratulations to the authors for the quality of the manuscript. Very good!

The idea is innovative and can help improve the quality of life of many patients.

The work is well written, well discussed and shows good results.

Although complementary studies are still needed, the results of the present study are very promising.

Tools that improve the quality of diagnosis and future treatment are always welcome.

Thanks for the invitation!
