Thank you for inviting me to review the manuscript entitled "Application and Pathway: Regulation of Traditional Chinese Medicine in Lung Cancer Treatment." Although this review article presents valuable information about the inhibitory effects of Chinese traditional medicine for the treatment of non-small cell lung cancer (NSCLC), this manuscript warrants significant improvement. The manuscript should be carefully edited to increase readability. Authors should include a table summarizing some recent studies conducted on the role of traditional Chinese medicine in lung cancer, with references embedded in these tables. Multiple sentences lack clarity and specificity throughout the manuscript. Missing references must be included.
