Potential competing interests: No potential competing interests to declare.

First, I would like to congratulate the authors for their effort in producing this manuscript. However, several drawbacks in this manuscript can be taken into count to make this manuscript to be impactful to their readers.

Abstract:

Authors may need to check on the typo. No descriptions on the period of the data collection.

Introduction:

Authors may consider to write the objectives as the last sentences in the introduction section to give a clear understanding to the readers the contents of the manuscript. No descriptions on the noise pollution standard used in Nigeria.

Problematic:

Authors may consider to change "Problematic" to "Literature Review".

Discussion of findings:

I'm a bit of confused, did the authors used "observation" technique as one of the research methodology or the word "observation" meant by authors is the observation from the Anova results?

Summary:

Why do the authors mentioned " chapters" in this section, does the author copied this from their thesis?

References:

Authors may need to relook on the references used in this manuscript. Some of it is outdated because more than 10 years.

It is a simple research manuscript presented by the authors. Authors have done a good job. Minor corrections may be needed. Good luck to the authors !
