Review of: "Causality in Machine Learning: Innovating Model Generalization through Inference of Causal Relationships from Observational Data"

Rachna Somkunwar[1]

1 Dr. D.Y. Patil Vidya Prathishthan Society

Potential competing interests: No potential competing interests to declare.

1. Abstract and Conclusion must be concise.

2. History of work need to be added in the introduction section

3. The proposed method needs to be compared with the existing work.

4. The latest literature based on similar work should be included

5. The result analysis part is weak, it shows implementation rather than analysis.

6. There is no comparison with the existing approach.
